A compassionate, enthusiastic, and responsible individual who is goal driven and organised. I am an exceptionally determined individual that possesses excellent interpersonal skills as well as the ability to work effectively independently.

COMPUTER SCIENCE EXPERIENCE

My formal CS education began at a GCSE level and continues now with me studying CS at University of St Andrews. Over this time, I've used a range of programming languages including Java, Python, C, JavaScript, HTML and CSS.

Due to my passion and interest in CS, I have also undertaken several personal projects. This includes basic game development using C#, and most recently app development for iOS in which I used Swift.
